

toqito: A Python package for quantum information

20 March 2020

Summary

Modern bioinformatics requires the use of many field-specific file formats. Two of the most prevalent formats for representing biological sequences are FASTA [pearson_improved_1988] and FASTQ [cock_sanger_2010].

toqito is released under the BSD 3-Clause License and is available from GitHub and PyPI.

Acknowledgements

This research is supported by the Unitary Fund [unitary_fund]

Thank you to Matthew Wakefield for helpful discussion and code review. The research benefited by support from the Victorian State Government Operational Infrastructure Support and Australian Government NHMRC Independent Research Institute Infrastructure Support. AFR was supported by the National Human Genome Research Institute of the NIH under award number RM1HG010461.
